7. Visit Fermont and discover its unique infrastructure

Labrador West shares a boarder with Quebec. Located about 25 kilometers from Labrador City on Route 389 is a town called Fermont. Fermont is also a mining town, much like Labrador City and Wabush. Their mine is Mount Wright, which is also an iron ore mine. But there is one major aspect that makes Fermont unique. When you first enter Fermont you will notice a 1.3 km and 50 m high windbreak “the wall” on the north side of town. Inspired by a Sweden Copper mining town. It is a self-contained structure containing apartments, stores, schools, bars, a hotel, restaurant, a supermarket, skating rink, gym, police department and pool. This shelters a community of smaller apartment buildings and homes on its leeward side.

8. View the Northern Lights

The biggest light show on Earth, the Northern Lights, plays to audiences on over 240 nights a year. Also known as the Aurora Borealis, these bright dancing lights are caused by collisions between electrically charged particles from the sun that enter the earth's atmosphere.

Depending on aurora activity and cloud conditions, you could spend hours watching as this magical show unfolds overhead. Whether you're fascinated by the science or thrilled by the opportunity to photograph the aurora, the sight of these dancing lights in the night sky nourishes all souls. The aurora borealis most often occurs from September to October and from March to April. For more information contact Gateway Labrador.
